

# Call for Papers Second International Conference

I-ESA 2006

Interoperability for Enterprise Software and Applications

<u>Cité Mondiale, 18 Parvis des Chartrons. Bordeaux, France,</u> Pre-conference March 20<sup>th</sup> - 21<sup>st</sup>, 2006. Conference March 22<sup>nd</sup> – 24<sup>th</sup>, 2006 Organised by INTEROP NoE (IST-508011) <u>www.interop-noe.org</u> and ATHENA IP (IST-507849) <u>www.athena-ip.org</u> and co-sponsored by IFIP and IFAC

## Scope

The interoperability in enterprise applications can be defined as the ability of a system or a product to work with other systems or products without special effort from the customer or user. The possibility to interact and exchange information internally and with external organisations is a key issue in the enterprise sector. It is fundamental in order to produce goods and services quickly, at lower cost, while maintaining higher levels of quality and customisation. Interoperability is considered to be achieved if the interaction can, at least, take place at the three levels: data, applications and business enterprise through the architecture of the enterprise model and taking into account the semantics. It is not only a problem of software and IT technologies. It implies support of communication and transactions between different organisations that must be based on shared business references.

Organized and supported by the European Network of Excellence INTEROP "Interoperability Research for Networked Enterprises Applications and Software (IST-508011, www.interop-noe.org) and the Integrated Project ATHENA "Advanced Technologies for Interoperability of Heterogeneous Enterprise Networks and their Application (IST-507849, www.athena-ip.org), I-ESA brings together the world's leading researchers and practitioners in the area of enterprise interoperability, dealing with a wealth of different issues of Interoperability for Enterprise Applications and Software.

The conference will focus on interoperability related research areas ranging from Enterprise Modelling to define interoperability requirements, over Architecture and Platforms to provide implementation frameworks to Ontologies to define interoperability semantics in the enterprise.

I-ESA is the successor and builds on the success of the INTEROP-ESA conference 2005, held in Geneva on February 2005.

## Topics

Papers are invited in the areas of interoperability, presenting original work and not previously published from professionals and academics. Topics for the conference include, but are not limited to:

- Enterprise and networked enterprises Modelling Methods, Tools and frameworks
- Manufacturing systems applications interoperability
- Management of Distributed Enterprise Models
- ✓ Standards for enterprise integration and interoperability
- ✓ Support for Co-operative Work
- ✓ Model Driven Architectures
- Interoperability of autonomous systems
- Interoperable Inter-enterprise Workflow Systems

- ✓ Case studies of systems' interoperability
- ✓ Enterprise-Control Systems integration and interoperability
- ✓ Methods, Models, and Tools for intra and interorganizations interoperability
- ✓ Requirements Engineering for Interoperable Enterprise ontologies
- ✓ Synchronisation and Interoperability of Distributed Enterprise Models and Modelling
- Enterprise Applications Analysis and semantic elicitation
- ✓ Architectures and platforms for interoperability
- ✓ Ubiquity, Mobility, Open Architectures and large scale interoperability
- ✓ Experiments and case studies relevant to the theme of the conference
- Service oriented Architectures
- ✓ Interoperability of Digital Rights Management Systems
- ✓ Business models for interoperable products and services
- ✓ Ontology-based semantic annotations and meta-data for models and data interoperability
- ✓ Reasoning methods and tools for model transformation and data reconciliation

# Workshop, Tutorials & Invited Sessions

The conference organises a pre-conference program on March 20th – 21st, 2006 with workshops and tutorials.

The I-ESA'2006 conference encourages the submission of invited sessions with sets of six invited papers on well-defined subjects of current interest belonging to the scope of the conference.

An invited session will be accepted only if the session and its 6 papers are accepted. Accepted papers of a non-accepted invited session will be transferred into regular sessions.

Organizers of tutorials and workshops, which will be organized in conjunction with the conference as a pre-Congress program, are encouraged to submit their proposals which will be reviewed by the conference IPC.

Proposals for workshops, tutorials or invited sessions shall be done through the conference web site <u>http://www.i-esa.org</u>

# **Doctoral Symposium**

Doctoral students interested to participate in the Doctoral Symposium are requested to submit an extended abstract of 5 pages or a full paper no longer than 10 pages in the Springer-Verlag LNCS format (<u>http://www.springer.de/comp/Incs/authors.html</u>), together with a supporting letter from their PhD supervisor to the Doctoral Symposium chair. Please send it to <u>program@iesa.org</u>

## Information for Authors

Submissions must be no longer than 12 pages in length and should follow the Springer Verlag LNCS format (see http://www.springer.de/comp/Incs/authors.html or instructions). Authors are requested to submit their manuscripts electronically in PDF format using the paper submission tool site available at the conference http://www.i-esa.org

The conference proceedings will be published after the conference (and will be sent by post to the registered participants). Papers will be included in the proceedings only if they are presented by one of the authors at the I-ESA 2006 conference. Selected papers will be submitted for special issues of International Scientific Journals.

For more information please visit our web site http://www.iesa.org or send a message to: program@i-esa.org

#### **General Chairperson**

Guy Doumeingts, ADELIOR France, FR Emeritus Professor, Université Bordeaux 1

**General Vice-Chairperson** Rainer Ruggaber, SAP, DE

International Program Committee Co-Chairpersons Gérard Morel, Université Henri Poincaré Nancy I, FR Jörg P. Müller, Siemens Corporate Technology, DE

eerg i maner, ere				
Workshops,	Tutorials	&	Invited	Sessions

Chairpersons Hervé Panetto, Université Henri Poincaré Nancy I, FR Nacer Boudjlida, Université Henri Poincaré Nancy I, FR

### **Doctoral Symposium Chairpersons**

Dr.Giovanna DiMarzo Serugendo, Birkbeck Coll., Univ.of London, GB Dr Jolita Ralyte, University of Geneva, CH

#### Local Organization Committee members From LAPS/GRAI, Université Bordeaux 1, FR

Thécle Alix Séverine Blanc David Chen Nicolas Daclin Yves Ducq Tania Oger Matthieu Roque Nabila Zouggar

#### **International Program Committee:**

		<b>J</b>
